

LAMARITE® SHAKE

COMPOSITE SHINGLES

PRODUCT DATA

Manufactured in Lamar, MO.

TAMKO® LAMARITE® SHAKE Composite Shingles are available in 5-inch, 7-inch, and 12-inch widths. The shingles feature the realistic look of wood shakes in an innovative composite shingle material. Molded with specific textures and contours of wood shakes to create authentic detail, dimension, and beauty.

ADVANTAGES

- 50 year limited warranty, 7-year FULL START, limited transferability, limited warranty for winds up to 90 MPH*.
- Formed to the specific textures and contours of wood shakes.
- Multiple pattern options.
- All the beauty of wood shakes.
- Attach using a pneumatic nail gun and two corrosion-resistant nails per shingle**.
- Application friendly design includes spacer tabs, exposure marks, and designated nailing areas.
- LAMARITE innovative composite roofing material provides long lasting protection and beauty.

*See limited warranty for details. For information regarding a copy of TAMKO's limited warranty, contact your local TAMKO representative, visit us online at lamarite.com, tamko.com, or call us at 800-641-4691.

**See printed application instructions for details.

 UL 2218

Miami Dade County Florida NOA 09-0319.04,
 Expiration Date 07/23/2014

***Contact TAMKO or Underwriters Laboratories for specific application requirements for UL Class A rated systems.

COLORS

Lamarite Shake Colors:

- Cedar
- Weathered Wood
- Dove Grey

APPLICATION

- When using 5-inch, 7-inch and 12-inch sizes, alternate the size of the first shingle in each successive course to prevent exposed nails and the keyways between shingles in one course from aligning with keyways in previous courses. The keyways should be offset a minimum of 2-inches. Occasionally it will be required to cut a custom size shingle. When doing so make sure to leave the cut edge smooth.
- The use of snow guards should be considered in areas where snow and ice accumulate.
- As with real shake, Lamarite Shake Composite Shingles will weather to a lighter shade after exposure to the environment creating a natural, beautiful look. TAMKO recommends viewing an actual roof installation prior to final color selection for the full impact of color blending, weathering and patterns.
- Increased variation in color uniformity may occur to Lamarite shingles in the vicinity of exposed copper or other metals.
